WATCHMAN MONITORING

PROTECTING YOUR BUSINESS THROUGH EARLY WARNING

IT departments are busy and don't always have the time to check their systems. Watchman Monitoring's hourly scans lessen the load on your IT department. Our early warning alerts can prevent data loss and downtime. In addition, our Contact Menu puts access to common resources right at users' fingertips.

WHAT IS WATCHMAN MONITORING?

Our light-weight, read-only agent inspects over 150 data-points every hour. Reports are sent to the Watchman Monitoring server, which proactively informs IT Professionals of issues such as failing hard drives or out of date backups.

⚠️ Disk I/O Errors

✅ SMART Status

✅ Malware Tests

✅ Root Capacity

✅ RAM errors

✅ FileMaker Server

⚠️ **Disk IO Errors**   2016-07-26 3:13 AM

[2016-07-26] 9 disk I/O errors on disk0s2, currently named "Macintosh HD"   [?] [**Actions** ▾]

CONTACT MENU

Our Contact Menu makes it easy for users to access a common list of company websites, launch frequently used applications, mount network drives, start screen-sharing sessions, or submit support tickets.

IMPLEMENTING WATCHMAN MONITORING

It takes just moments to implement Watchman Monitoring:

1. Decide on the Groups to create.
2. Customize your Contact Menu items.
3. Decide where emailed alerts will be sent.
4. Deploy the Monitoring Client.

DESIGNED FOR IT PROFESSIONALS

Consultants can deploy and manage Watchman Monitoring for their customers. Businesses can use Managed Accounts to monitor up to 250 Mac, Windows, or Linux computer in their organization. Managed Accounts can be purchased from our Provider Network. Our Professional Tier enables larger companies and schools to protect all of their computers. Start your trial today!
